Zachariah Hansen

Software Engineer | FullStack Developer

LinkedIn • zachariahjhansen@gmail.com • GitHub • 702-480-9070 • Portfolio

Skills

Proficient: C# | PHP | Laravel | Python | HTML | CSS | PostgreSQL | GitHub | Docker | JavaScript | Dart
Intermediate: C++ | Rust | Java | Cloudflare | Kafka | Redis | React

Experience

Nascence Technologies - Full Stack Software Engineer Oct. 2025 – Present

- Architected and executed migration from MySQL/CosmosDB to PostgreSQL, reducing monthly database costs by 80% ($250 to $50) while improving query performance for legal case management application.
- Developed full-stack tagging feature including PostgreSQL schema design, Laravel backend logic, and modal-based UI with keyboard shortcuts for rapid document categorization.
- Refactored 2,000-line monolithic controller into modular, maintainable architecture, improving code organization and development velocity for 4-person team.
  Technologies: PHP | Laravel | Python | PostgreSQL

Aabo Home - Software Engineer July 2025 - Oct. 2025

- Developed and maintained iSoftPull credit check integration for customer onboarding, enabling equipment selection and Sunlight Financing using PHP/Laravel and PostgreSQL.
- Implemented comprehensive PHPUnit test coverage for the entire credit check and financing process, improving code reliability and reducing bugs.
- Created technical documentation in Notion for team knowledge sharing, improving onboarding efficiency and development standardization.
  Technologies: PHP | Laravel | PostgreSQL

Salt Lake Weekly - Full Stack Developer Apr. 2025 - June 2025

- Implemented Swagger documentation for API, improving developer experience and accessibility.
- Migrated existing application to React Native, enabling cross-platform functionality.
  Technologies: JavaScript | React | React Native | PostgreSQL | BitBucket | Jira

Motorola Solutions - Software Engineering Intern Jan. 2025 – Mar. 2025

- Optimized the codebase of the Premier One Records Management Software by refactoring complex C# code.
- Eliminated over 300 IDE warning messages and achieved 98% code coverage through comprehensive unit testing, ensuring robust software functionality and reducing potential runtime errors.
  Technologies: C# | MSTest | Visual Studio | Azure

WorkChat - FullStack Developer Oct. 2024 – Dec. 2024

- Developed cross-platform mobile application using Flutter, showcasing mobile development expertise.
- Engineered real-time WebSocket messaging to enable instant, seamless communication.
  Technologies: Flutter | PostgreSQL | AWS | Python | Docker | Trello

Leadership & Activities

Neumont Hackathon - First Place May 2025

- Participated in a 48-hour intensive project developing an autism prediction machine learning model with high accuracy, implementing and testing multiple ML algorithms including Logistic Regression, Random Forest, XGBoost, CatBoost, and Neural Networks while utilizing Optuna for hyperparameter optimization on an imbalanced dataset.

Education

Neumont College of Computer Science **Salt Lake City, UT**
Bachelor of Science, Software Engineering. GPA: 3.99 Sept. 2025
